STAFF REPORT - TOWN OF NORTH CASTLE PLANNING DEPARTMENT

APPLICATION NUMBER - NAME

#19-017 - Harris

Site Plan and Wetlands Permit Approvals

MEETING DATE November 13, 2023 SBL

108.02-1-58

PROPERTY ADDRESS/LOCATION

9 Sterling Road N

BRIEF SUMMARY OF REQUEST

Proposed new pool and patio located in the Town-regulated wetland buffer.

This property was previously referred for Planning Board site plan approval by the RPRC.

PENDING ACTION:	■ Plan Review	☐ Town Board Refe	erral 🗆 Preliminary D	Discussion
EXISTING ZONING	EXISTING LAND USE	SURROUNDING ZONING & LAND USE	SITE IMPROVEMENTS	SIZE OF PROPERTY
R-2A One-Family Residence District (2 acre)	Existing Single-family home	Residential	Pool and Patio	2 acres

PROPERTY HISTORY **COMPATIBILITY with the COMPREHENSIVE PLAN**

Existing Single Family Home

2018 – Approval for entry porch and deck expansion

- Continue to take neighborhood context into account in approving new single-family homes.
- Continue to protect natural resources and environmentally sensitive areas such as rivers, streams, lakes, ponds, wetlands, flood plains, aquifers, wildlife habitats, steep slopes and forested areas, significant trees, and woodlands, among others, from unnecessary and avoidable impacts.
- Continue strong protection of tree cover through the tree removal permitting process.
- Preserve the current overall development pattern of North Castle and its neighborhoods. Be sure new development responds to environmental constraints, particularly for preservation of the New York City watershed.
- Maintain the quality-of-life created by physical and natural attributes, by structuring development that promotes sound conservation measures.
- The Town should encourage residential development that is compatible in scale, density, and character with its neighborhood and natural environment.

STAFF RECOMMENDATIONS & PLANNING BOARD POLICY DECISIONS

- 1. The Planning Board will need to determine whether it would be appropriate to permit a pool entirely within the Town-regulated wetland buffer.
- 2. The Planning Board will need to determine whether the project is compatible with the Comprehensive Plan.

Procedural Comments

- 1. The Proposed Action would be classified as a Type II Action pursuant to the State Environmental Quality Review Act (SEQRA).
- 2. A public hearing regarding the proposed wetland permit will need to be scheduled.

General Comments

1. The Planning Board last discussed this application on February 27, 2023. At that meeting the Planning Board directed the Applicant to prepare a wetland functional analysis and to discuss the functional analysis with the Conservation Board.

The Applicant prepared the wetland functional analysis and discussed the plan and functional analysis with the Conservation Board. The Conservation Board in an August 3, 2023 memorandum to the Planning Board recommended approval of the requested wetlands permit.

- 2. The site plan depicts 9,988 square feet of Town-regulated wetland buffer disturbance and 20,000 square feet of mitigation area.
- 3. The site plan should depict proposed Town-regulated tree removal.
- 4. The previously proposed amount of gross land coverage (15,981 square feet) exceeds the maximum amount permitted by the Town Code (13,435 square feet). The site plan shall be revised to comply with the Town Code or the Applicant will need to seek a variance from the Zoning Board of Appeals.

- 5. The site plan shall be revised to depict the removal of the existing retaining wall located in the Seymour Place West right-of-way.
- The submitted site plan should be revised to depict the proposed pool, pool fence and equipment locations.
- 7. The Applicant shall submit documentation demonstrating that the proposed new septic plan is acceptable to Westchester County Department of Health.

Staff Notes

The Applicant has prepared a mitigation plan that proposes to remove invasive species and the planting of new material by hand.

The Planning Board will need to determine whether the requested wetlands permit is acceptable.

If no Town-regulated tree removal is proposed, the site plan should be revised to include a note stating such.

Given that the proposed new gross land coverage is located in an environmentally sensitive Town-regulated wetland buffer, it is recommended that the Planning Board not support the required gross land coverage variance.

The gross land coverage calculations worksheet and backup data should be updated to reflect the most recent submission.
