COMPATIBILITY with the COMPREHENSIVE PLAN

- Continue to take neighborhood context into account in approving new single-family homes.
- Continue to protect natural resources and environmentally sensitive areas such as rivers, streams, lakes, ponds, wetlands, flood plains, aquifers, wildlife habitats, steep slopes and forested areas, significant trees, and woodlands, among others, from unnecessary and avoidable impacts.
- Continue strong protection of tree cover through the tree removal permitting process.
- Preserve the current overall development pattern of North Castle and its neighborhoods. Be sure new development responds to environmental constraints, particularly for preservation of the New York City watershed.
- Maintain the quality-of-life created by physical and natural attributes, by structuring development that promotes sound conservation measures.
- The Town should encourage residential development that is compatible in scale, density, and character with its neighborhood and natural environment.
